Protecting the right to freedom of expression under the European Convention on Human Rights

A handbook for legal practitioners

Council of Europe European Convention on Human Rights - Article 10 - Freedom of expression 1. Everyone has the right to freedom of expression. This right shall include freedom to hold opinions and to receive and impart information and ideas without interference by public authority and regardless of frontiers. This article shall not prevent States from requiring the licensing of broadcasting, television or cinema enterprises. 2. The exercise of these freedoms, since it carries with it duties and responsibilities, may be subject to such formalities, conditions, restrictions or penalties as are prescribed by law and are necessary in a democratic society, in the interests of national security, territorial integrity or public safety, for the prevention of disorder or crime, for the protection of health or morals, for the protection of the reputation or rights of others, for preventing the disclosure of information received in confidence, or for maintaining the authority and impartiality of the judiciary. In the context of an effective democracy and respect for human rights mentioned in the Preamble to the European Convention on Human Rights, freedom of expression is not only important in its own right, but it also plays a central part in the protection of other rights under the Convention. Without a broad guarantee of the right to freedom of expression protected by independent and impartial courts, there is no free country, there is no democracy. This general proposition is undeniable. This handbook is a practical tool for legal professionals from Council of Europe member states who wish to strengthen their skills in applying the European Convention on Human Rights and the case law of the European Court of Human Rights in their daily work.

Parentology

Everything You Wanted to Know about the Science of Raising Children but Were Too Exhausted to Ask

Simon and Schuster An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Science for Policy Handbook

Elsevier *Science for Policy Handbook* provides advice on how to bring science to the attention of policymakers. This resource is dedicated to researchers and research organizations aiming to achieve policy impacts. The book includes lessons learned along the way, advice on new skills, practices for individual researchers, elements necessary for institutional change, and knowledge areas and processes in which to invest. It puts co-creation at the centre of *Science for Policy 2.0*, a more integrated model of knowledge-policy relationship. Covers the vital area of science for policymaking. Includes contributions from leading practitioners from the Joint Research Centre/European Commission. Provides key skills based on the science-policy interface needed for effective evidence-informed policymaking. Presents processes of knowledge production relevant for a more holistic science-policy relationship, along with the types of knowledge that are useful in policymaking.

Common European Framework of Reference for Languages: Learning, Teaching,

assessment

Companion volume

Council of Europe The CEFR Companion volume broadens the scope of language education. It reflects academic and societal developments since the publication of the Common European Framework of Reference for Languages (CEFR) and updates the 2001 version. It owes much to the contributions of members of the language teaching profession across Europe and beyond. This volume contains: ► an explanation of the key aspects of the CEFR for teaching and learning; ► a complete set of updated CEFR descriptors that replaces the 2001 set with: - modality-inclusive and gender-neutral descriptors; - added detail on listening and reading; - a new Pre-A1 level, plus enriched description at A1 and C levels; - a replacement scale for phonological competence; - new scales for mediation, online interaction and plurilingual/pluricultural competence; - new scales for sign language competence; ► a short report on the four-year development, validation and consultation processes. The CEFR Companion volume represents another step in a process of engagement with language education that has been pursued by the Council of Europe since 1971 and which seeks to: ► promote and support the learning and teaching of modern languages; ► enhance intercultural dialogue, and thus mutual understanding, social cohesion and democracy; ► protect linguistic and cultural diversity in Europe; and ► promote the right to quality education for all.

Importing Into the United States

A Guide for Commercial Importers

This edition of Importing Into the United States contains material pursuant to the Trade Act of 2002 and the Customs Modernization Act, commonly referred to as the Mod Act. Importing Into the United States provides wide-ranging information about the importing process and import requirements. We have made every effort to include essential requirements, but it is not possible for a book this size to cover all import laws and regulations. Also, this publication does not supersede or modify any provision of those laws and regulations. Legislative and administrative changes are always under consideration and can occur at any time. Quota limitations on commodities are also subject to change. Therefore, reliance solely on the information in this book may not meet the "reasonable care" standard required of importers.

Night Noise Guidelines for Europe

WHO Regional Office Europe Environmental noise is a threat to public health, having negative impacts on human health and wellbeing. This book reviews the health effects of night time noise exposure, examines dose-effects relations, and presents interim and ultimate guideline values of night noise exposure. It offers guidance to the policy-makers in reducing the health impacts of night noise, based on expert evaluation of scientific evidence in Europe. The review of scientific evidence and the derivation of guideline values were conducted by outstanding scientists. The contents of the document were peer-reviewed and discussed for a consensus among the experts and the stakeholders. We are thankful for those who contributed to the development and presentation of this guidelines and believe that this work will contribute to improving the health of the people in the Region.

Marlowe, Shakespeare, and the Economy of Theatrical Experience

University of Pennsylvania Press This study explores the structure of psychological, social and political exchanges that were negotiated between audiences and plays in Elizabethan public theatres in a period ostensibly dominated by Shakespeare, but strongly rooted in Marlowe.

Theatre Audiences

A Theory of Production and Reception

Psychology Press Susan Bennett's landmark work, *Theatre Audiences*, explores the audience's role in traditional and avant-garde theatre, and the impact of the spectator upon the performance itself. This 2nd edition includes a new chapter, new conclusion and illustrations.

Private Readings/public Texts

Playreaders' Constructs of Theatre Audiences

Fairleigh Dickinson Univ Press In this volume, Kenneth Krauss maintains that if readers are to comprehend playscripts as plays, they must imagine the theatre audience - so vital to the staging of any script, but conspicuously absent from the text itself. Krauss examines what has been written about reading playscripts (or "playreading") and proposes four possible ways, founded on a reception-oriented approach to theatre communication and spectator response, that playreaders may construct a sense of theatre audiences. The study begins with a review of a varied collection of books and dissertations, written over the last forty-five years, all of which explicitly discuss playreading and exhibit only minor interest in the relationship between reader and theatre audience. The study next attempts to explain why writers more sympathetic to a reader-centered view of reading, notably reader-response critics, have avoided dramatic texts almost entirely. The study finds that both theoretical and institutional limitations have kept recent so-called audience-centered critics from the crucial issues related to reading playscripts. Drawing on play reading literature and on theatre reception theory, the study presents four spectator constructs which readers may deploy during the reading of playscripts. The first is what some, notably David Scanlan and Karen Laughlin, see as the "inscribed" audience (the rhetorical "house" implied by the playscript itself), which is in fact usually a projection of readers themselves. The second construct, originally proposed by Roger Gross, is the hypothetical audience which is significantly distinct from text and reader. The third and fourth, suggested by Kirsten Nigro, are the more specific actual or historical audience - which is based on hard data about real spectators - and the speculated audience, which focuses on either those who never come to see the play in question or those who actually did come but who must be imagined seeing the performance under different circumstances. These constructs are illustrated through four separate but related explorations of Jean Genet's *Les Bonnes*. The study offers a credible but highly subjective rhetorical reading and then develops a hypothetical approach which is (deliberately) flawed in part. The study then turns to the play's original staging and attempts to explain the negative responses of the actual spectators who attended the play's premiere run. Finally, in an attempt to speculate upon who might have comprised a better audience for Genet's play, the study concludes by inventing a restaging of the play in a different theatre, by different actors, under a different director, and by constructing a highly select and very appreciative house.

Handbook of Deep Trade Agreements

World Bank Publications Deep trade agreements (DTAs) cover not just trade but additional policy areas, such as international flows of investment and labor and the protection of intellectual property rights and the environment. Their goal is integration beyond trade or deep integration. These agreements matter for economic development. Their rules influence how countries (and hence, the people and firms that live and operate within them) transact, invest, work, and ultimately, develop. Trade and investment regimes determine the extent of economic integration, competition rules affect economic efficiency, intellectual property rights matter for innovation, and environmental and labor rules contribute to environmental and social outcomes. This Handbook provides the tools and data needed to analyze these new dimensions of integration and to assess the content and consequences of DTAs. The Handbook and the accompanying database are the result of collaboration between experts in different policy areas from academia and other international organizations, including the International Trade Centre (ITC), Organisation for Economic Co-operation and Development (OECD), United Nations

Conference on Trade and Development (UNCTAD), and World Trade Organization (WTO).
