Royal Society of Chemistry **This book covers the chemistry of the non-metallic elements (the halogens, boron, carbon, nitrogen, oxygen, silicon, phosphorus and sulfur) and uses their role in agriculture (for example, nitrogen and sulfur), industry (for example, sulfuric acid), and everyday life (for example, the chlorination of drinking water) to illustrate this chemistry. Their role in organic chemistry and biochemistry is also emphasized. Two interactive CD-ROMs accompany the book, incorporating electronic questions that facilitate revision/consolidation. This book is part of The Molecular World series which aims to provide a broad foundation in chemistry.**

Entrepreneurship and Small Business

A publication of SBPD Publishing House (Sanjay Sahitya Bhawan)

SBPD Publishing House **Entrepreneurship** is the most important instrument of social and economic development. It is because of this reason it is remarked that developing countries are not underdeveloped but undermanaged. It is true of Japan. About a century ago Japan was considered as an underdeveloped country. Thanks to the rapid progress made by Management science, now Japan is regarded as one of the most advanced countries of the world. Increasing production and productivity is the need of the hour. These are dependent upon physical factors or natural resources of a country and its human resource. However, the resources capable of enlargement can only be human resource. All other resources stand under the laws of mechanics. They can be better utilised or worse utilised but they can never have an output greater than the sum of the inputs. Man alone of all the resources available to man, can grow and develop if properly directed and motivated. In line with this thinking, there has been a revolutionary change in management philosophy. He (man) is potentially creative, trustworthy and co-operative. He is also considered to possess the potential for growth, achievement and constructive action with others. It is the job of the management to nurture and tap employee's productive drives. Entrepreneurship, therefore, hold the key to the economic development of a nation. It is because of this reason the U.G.C.'s Unified Syllabus has included the study of business management subject in almost every course in business and management disciplines, be it B. Com., M. Com., B.B.A. or M.B.A., C.A.C.S., C.W.A. and so on. The author has tried to explain the subject in the most simple language. Extensive use of charts, pictures and diagrams has been made to explain and illustrate the difficult concepts and Fundamentals of Entrepreneurship. Important questions asked in the examinations conducted by various universities and professional institutes have been given at the end of each chapter. The authors sincerely believe that the book will be of immense use and help the students preparing for these examinations.

Business Studies Class-12 Poonam Gandhi (Session 2021-22) Examination

VK Global Publications The book has been designed topic and subtopic-wise, keeping the students' needs in mind. The current edition has certain unique features: This book is strictly as per the latest CBSE syllabus and covers complete matter as per the NCERT book. After every topic, objective type questions and case studies are given based on the latest CBSE Sample Paper (2020). (Hints of their answers are given at the end of each chapter.) At the end of each chapter, 40 objective type questions (20 MCQs + 10 Fill in the blanks + 10 True/False) are given along with answers at the end. Keywords of each topic are given at the end of each topic, to help students to solve case studies. A flow chart of each chapter is given at the end to recap the topics covered in that chapter. Quick revision is given to revise all the topics in short time. At the end of each chapter, questions asked in last 7 years' board exam are given, so that the student may get an idea of what types of questions are expected from this chapter. (Hints of answers of these questions are also given). Case Studies are framed by using words strictly from the NCERT. A solved sample paper of CBSE 2020 is also given. Guidelines for project are also given. A sample project on Marketing Management is also given. The Subject Matter is presented in simple language, in points, and along with diagrams, so that the student may find it easy to understand.

Python Tutorial

Release 3. 6. 6rc1

Createspace Independent Publishing Platform **Python is an easy to learn, powerful programming language. It has efficient high-level data structures and a simple but effective approach to object-oriented programming. Python's elegant syntax and dynamic typing, together with its interpreted nature, make it an ideal language for scripting and rapid application development in many areas on most platforms. The Python interpreter and the extensive standard library are freely available in source or binary form for all major platforms from the Python Web site, <https://www.python.org/>, and may be freely distributed. The same site also contains distributions of and pointers to many free third party Python modules, programs and tools, and additional documentation. The Python interpreter is easily extended with new functions and data types implemented in C or C++ (or other languages callable from C). Python is also suitable as an extension language for customizable applications. This tutorial introduces the reader informally to the basic concepts and features of the python language and system. It helps to have a Python interpreter handy for hands-on experience, but all examples are self contained, so the tutorial can be read off-line as well. For a description of standard objects and modules, see [library-index](#). [reference-index](#) gives a more formal definition of the language. To write extensions in C or C++, read [extending-index](#) and [c-api-index](#). There are also several books covering Python in depth. This tutorial does not attempt to be comprehensive and cover every single feature, or even every commonly used feature. Instead, it introduces many of Python's most noteworthy features, and will give you a good idea of the language's flavor and style. After reading it, you will be able to read and write Python modules and programs, and you will be ready to learn more about the various Python library modules described in [library-index](#). The Glossary is also worth going through.**

The Principles of Scientific Management

Cosimo Classics It seems, at first glance, like an obvious step to take to improve industrial productivity: one should simply watch workers at work in order to learn how they actually do their jobs. But American engineer FREDERICK WINSLOW TAYLOR (1856-1915) broke new ground with this 1919 essay, in which he applied the rigors of scientific observation to such labor as shoveling and bricklayer in order to streamline their work... and bring a sense of logic and practicality to the management of that work. This highly influential book, must-reading for anyone seeking to understand modern management practices, puts lie to such misconceptions that making industrial processes more efficient increases unemployment and that shorter workdays decrease productivity. And it laid the foundations for the discipline of management to be studied, taught, and applied with methodical precision.

The Social Construction of Reality

A Treatise in the Sociology of Knowledge

Open Road Media **The classic work that redefined the sociology of knowledge and has inspired a generation of philosophers and thinkers In this seminal book, Peter L. Berger and Thomas Luckmann examine how knowledge forms and how it is preserved and altered within a society. Unlike earlier theorists and philosophers, Berger and Luckmann go beyond intellectual history and focus on commonsense, everyday knowledge—the proverbs, morals, values, and beliefs shared among ordinary people. When first published in 1966, this systematic, theoretical treatise introduced the term social construction, effectively creating a new thought and transforming Western philosophy.**

Arabic Poems

WestBow Press **The Arabic poetic legacy is as vast as it is deep, spanning a period of fifteen centuries in regions from Morocco to Iraq. As a unifying principle, editor Marlé Hammond has selected eighty poems reflecting desire and**

longing of various kinds: for the beloved, for the divine, for the homeland, and for change and renewal. Poets include the legendary pre-Islamic warrior 'Antara Ibn Shaddad, medieval Andalusian poet Ibn Zaydun, the wandering poet Al-A'sha, and the influential Egyptian Romantic Ahmad Zaki Abu Shadi. Here too are literary giants of the past century: Khalil Jibran, author of the bestselling *The Prophet*; popular Syrian poet Nizar Qabbani; Palestinian feminist Fadwa Tuqan; Mahmoud Darwish, bard of occupation and exile; acclaimed iconoclast Adonis, and more. In their evocations of heroism, nostalgia, mysticism, grief, and passion, the poems gathered here transcend the limitations of time and place.

Strategic Management (color)

Strategic Management (2020) is a 325-page open educational resource designed as an introduction to the key topics and themes of strategic management. The open textbook is intended for a senior capstone course in an undergraduate business program and suitable for a wide range of undergraduate business students including those majoring in marketing, management, business administration, accounting, finance, real estate, business information technology, and hospitality and tourism. The text presents examples of familiar companies and personalities to illustrate the different strategies used by today's firms and how they go about implementing those strategies. It includes case studies, end of section key takeaways, exercises, and links to external videos, and an end-of-book glossary. The text is ideal for courses which focus on how organizations operate at the strategic level to be successful. Students will learn how to conduct case analyses, measure organizational performance, and conduct external and internal analyses.
