The Routledge Handbook of Tourism and Sustainability

Routledge *Routledge Handbook of Tourism and Sustainability* from C. Michael Hall, Stefan Gössling, Daniel Scott is one of the winners of the ITB BookAwards 2016 in the category Specialist tourism literature! Sustainability remains one of the major issues in tourism today. Concerns over climate and environmental change, the fallout from the global economic and financial crisis, and the seeming failure to meeting UN Millennium development goals have only reinforced the need for more sustainable approaches to tourism, however they be defined. Given the centrality of sustainability in tourism curricula, policies, research and practice it is therefore appropriate to prepare a state of the art handbook on the relationship between tourism and sustainability. This timely *Handbook of Tourism and Sustainability* is developed from specifically commissioned original contributions from recognised authors in the field, providing a systematic guide to the current state of knowledge on this area. It is interdisciplinary in coverage and international in scope through its authorship and content. The volume commences with an assessment of tourism's global environmental, e.g. climate, emissions, energy use, biodiversity, water use, land use, and socio-economic effects, e.g. economic impacts, employment and livelihoods, culture. This then provides the context for sections outlining the main theoretical frameworks and constructs that inform tourism and sustainability, management tools and approaches, and the approaches used in different tourism and travel industry sectors. The book concludes by examining emerging and future concerns in tourism and sustainability such as peak-oil, post-carbon tourism, green economy and transition tourism. This is essential reading for students, researchers and academics interested in the possibilities of sustainable forms of tourism and tourism's contribution to sustainable development. Its assessment of tourism's global impact along with its overviews of sectoral and management approaches will provide a benchmark by which the sustainability of tourism will be measured for years to come.

Public Interest Law

An Economic and Institutional Analysis

What is public interest law? How effective is it? What are the limits to litigation as a mechanism for conflict resolution? In this study, economists, lawyers, and sociologists evaluate an institutional form that is new to American society and, indeed, to the world--the public interest law (PIL) organization. The book introduces the reader to the structure, resources, and activities of this "nonprofit industry," and also to the factors that affect PIL firms in their choices of cases and methods of handling them. The authors examine PIL's vast range of contemporary public policy concerns. These include such general topics as the environment, consumerism, housing, employment discrimination, medical care, occupational health and safety, education finance, and taxation. A number of base studies are presented, and a method for economic analysis and evaluation is introduced and applied. The study points to PIL's success in advocating under-represented interests, in winning courtroom decisions, and in translating legal victories into reallocations of resources. At the same time, it notes the bias of PIL towards test-case litigation, a propensity to focus on judicial victories rather than on real social change, and a tendency to use lawyers even when other types of professionals might be more effective. Many of these problems stem from uncertainty of funding and legal restrictions on "nonprofit" organizations. The result is a set of hurdles that distracts PIL firms from their principal goals. The authors do not limit themselves to PIL, but comment on the effectiveness of legal instruments as devices for social change, and on the behavior of the voluntary nonprofit sector, a little-studied portion of the economy. The book presents a fresh approach to the study of both collective-type economic problems and institutional setting in
