METABOLISM IN ARCHITECTURE

Even in a country where outstanding achievements have become almost a commonplace, the Japanese architect, Kisho Kurokawa, appears as both a remarkable and a remarkably successful man. With buildings in the United States and Eastern and Western Europe as well as in Japan, he has established an international reputation as a leading figure amongst the younger generation of architects. At the age of forty he already had thirty-five major buildings and seventeen books to his credit; four new towns are being built to his designs; he heads a company of over a hundred employees, he runs a think-tank and an urban design bureau and for variety he has his own television programme with a regular audience of some 30 million. Behind these statistics lies a prodigious vitality expressed in original and stimulating buildings. -- from book jacket.

SYSTEMS, SOFTWARE AND SERVICES PROCESS IMPROVEMENT

17TH EUROPEAN CONFERENCE, EUROSPI 2010, GRENOBLE, FRANCE, SEPTEMBER 1-3, 2010. PROCEEDINGS

Springer Science & Business Media A typical characterization of EuroSPI is reflected in a statement made by a company: ". . . the biggest value of EuroSPI lies in its function as a European knowledge and experience exchange mechanism for SPI and innovation." Since its beginning in 1994 in Dublin, the EuroSPI initiative has outlined that there is not a single silver bullet to solve SPI issues, but that you need to understand a combination of different SPI methods and approaches to achieve concrete benefits. Therefore each proceedings volume covers a variety of different topics, and at the conference we discuss potential synergies and the combined use of such methods and approaches. These proceedings contain selected research papers for five topics: Section I: SPI Tools Section II: SPI Methods Section III: SPI in SMEs Section IV: Economic Aspects of SPI Section V: The Future of SPI Section I presents studies on SPI tools. The authors provide an insight into new tools which can be used for SPI. Willem Bekkers et al. present a new assessment method and tool for software product management. Ismael Edrei-Espinosa-Curiel et al. illustrate a graphical approach to support the teaching of SPI. Paul Clarke and coworkers deal with an analysis and a tool to help real adoption of standards like ISO 12207 and they focus on SPI implementation and practices. Esparanca Amengual et al. present a new team-based assessment method and tool.

AGEING, GENDER, AND LABOUR MIGRATION

Springer This book explores how the real conditions and subjective conceptions of ageing and well-being are transformed when people move from one country to another. Focusing on ageing female migrants from Latvia in the UK and other European countries, this book is based on fifty life-history interviews with women aged 40s-60s. Empirical chapters concentrate on functional well-being in migration, which includes access to the economic citizenship of work, income, pensions, and accommodation, and on psychosocial well-being, and explores Latvian women's experiences of intimate citizenship in migration. In addition, the authors' research challenges the trope of vulnerability which generally surrounds the framing of older migrants' lives. The study's findings offer policy-makers insights into the realities of ageing working migrants and advocates for a more inclusive transnational citizenship, better working conditions, and ongoing care arrangements for older migrants post-retirement, either abroad or back home.

ADVANCED DRILLING ENGINEERING

PRINCIPLES AND DESIGNS

Gulf Publishing Company Drilling technology has advanced immensely in the past 20 years. Directional drilling, rotary steerable drilling and other smart downhole techniques and tools have progressed past the typical vertical and horizontal well, allowing drilling engineers to design wells of complex geometry and extract energy resources from remote, untapped places. While technology continues to excel, there is a growing need for multidisciplinary information to assist in the design and planning of complex wells. To answer this need, Robello Samuel, with the help of Xiushan Liu, releases a necessary reference titled Advanced Drilling Engineering. Samuel and Liu's volume covers full understanding of elaborate drilling processes and engineering well design aspects. Starting with well trajectory and wellbore positioning, they explain well-path planning for directional and extended-reach wells. Other vital topics include collision avoidance, checking for proximity between neighboring wells, downhole survey tools plus MWD/LWD and through bit logging, and intelligent smart well technology, including downhole monitoring tools.

EFFECTIVE SOFTWARE PROJECT MANAGEMENT

John Wiley & Sons Why another book on software project management? For some time, the fields of project management, computer science, and software development have been growing rapidly and concurrently. Effective support for the enterprise demands the merging of these efforts into a coordinated discipline, one that incorporates best practices from both systems development and project management life cycles. Robert K. Wysocki creates that discipline in this book--a ready reference for professionals and consultants as well as a textbook for students of computer information systems and project management. By their very nature, software projects defy a "one size fits all" approach. In these pages you will learn to apply best-practice principles while maintaining the flexibility that's essential for successful software development. Learn how to make the planning process fit the need * Understand how and why software development must be planned on a certainty-to-uncertainty continuum * Categorize your projects on a four-quadrant model * Learn when to use each of the five SDPM strategies--Linear, Incremental, Iterative, Adaptive, and Extreme * Explore the benefits of each strategic model and what types of projects it supports best * Recognize the activities that go into the Scoping, Planning, Launching, Monitoring/Controlling, and Closing phases of each strategy * Apply this knowledge to the specific projects you manage * Get a clear picture of where you are and how to get where you want to go

NAGARJUNA'S LETTER TO A FRIEND

WITH COMMENTARY BY KANGYUR RINPOCHE

[Shambhala Publications](#) The great Indian Buddhist master Nagarjuna wrote his celebrated poem Letter to a Friend as a gift of advice to a South Indian king, and it has since become a monument in the Indian shastra tradition.
