Peace on Earth, Millennium of King Jesus

Futuristic World Government

Tate Publishing Join father/son team G. L. and Glenn Cook in their exploration of the Bible to understand God's ultimate plan for everlasting peace, joy, and happiness on the earth. Peace on Earth: Millennium of King Jesus is the writers' authoritative compendium of eschatological texts, especially relating to the futuristic years when Jesus Christ will return to the earth at the Battle of Armageddon and afterward, bring everlasting peace to all nations on the earth. It is good news! Biblical evidence and details are presented to demonstrate how King Jesus will literally establish his 1,000-year, theocratic, world-dominating government. As John G. Hall, one of the writers' favorite professors of biblical eschatology, once stated, 'If you don't believe King Jesus and his saints will be riding white horses when he returns to the earth, then you can just walk and I will ride.'

Manual on the Millennium

Handbook for the Study of the End Times

WestBow Press [Manual on the Millennium](#) is an examination of the viewpoints concerning the nature of the millennium and how they relate to the associated end-time events. The author argues for his own personal viewpoint, as well as with the problems inherent in interpreting those events that are so popular with the dispensational pre-millennialist views. He provides a fresh examination of such subjects as the postponed kingdom, the restoration of Israel, rebuilding the temple, the Battle of Armageddon, the Antichrist, and the seventy weeks of Daniel. The author maintains that the arbitrary interpretation of the millennium of Revelation as a literal period of a thousand years as a whole does not fit the judgment teachings of the New Testament or the complete message of the return of Christ, in context with the rest of the Scriptures. The proper interpretation of the nature of the millennium is foundational to understanding the prophetic message of the New Testament. This work is designed to be a valuable resource and handbook for the study of end-time events for the serious Bible student.

Alchemical Manual for This Millenium

Volume 1

We are a group of star people authorized at this time to bring to earth vital information about the physical conditions in which you live. Even though you have made much scientific progress you cannot move forward unless you are willing to courageously examine new information that may not match your learning, and to make fundamental changes in your outlook regarding the nature of reality. Changes start at the beginning. You have been told to view the world in a particular manner when you were only a child, a manner dictated by your culture. Your teachings held erroneous information. Therefore, we dedicate this manuscript to the young men and women who may find ways to recover a more accurate concept of life on earth. Times have changed. You see around you more evidence of how the Universe works. Education and experience for every person on earth has vastly increased. Still, scientific information has not been available to many people because they do not possess the mathematical skills to read and make sense of documents written in algebraic jargon. They, therefore, dismiss the study of physics as "too hard" to understand. That should never happen. Most anyone can learn the Universal Laws about energy. Complex as they may seem, the laws are consistent, and can be basically grasped by a ten year old child. To make that understanding possible very little math has been included in this book. We are assuming here that the reader of this book has an open mind and has some basic interest and experience in general science. He or she may be an average person with a curiosity about how and why things work the way they do. An advanced student may be disadvantaged by previous assumptions. We beg their patience. The first chapter is, perhaps, the hardest to understand in the whole book because it deals with abstract principles. We suggest that you skip over what seems vague to you and go on reading, then come back to the laws over and over again, as you see how they might be applied. Not all the answers are given at first. This is a survey study and introduces one idea at a time. Some of the ideas in this book are revolutionary to your thinking. Some are common knowledge. If you can grasp a few of the major premises in the work it will change and expand both you and your world. It is the ideas that are important, not the source. At the start, we want you to know that the star people are real living beings that are a lot like yourself. We wish to communicate with you. Therefore, we choose to stay neutral in terms of names and places. Our earth contact, Aaity Olson, is not privileged to special information concerning us. Our secretary does not ask personal questions, nor should you. Our scribe is unschooled in science but she has outstanding artistic and spatial ability, and can see the visions we project of three and four dimensional diagrams. In this text you will see that there is certainly a language problem between old concepts and new. Bear with us, and you may have an opportunity to add your own perspectives to interpretations, especially regarding the definition of words. Name ideas in a way that all can understand. We will ask you to work with energies that are invisible to you. Even as they are invisible you can see their shadow effects. Be patient with us and with yourself and all will be clear to you over time. Read as much as you can, then rest. Let the concepts be taken into your center.

Hydropower in the New Millennium

Proceedings of the 4th International Conference Hydropower, Bergen, Norway, 20-22 June 2001

CRC Press The power sector has undergone a liberalization process both in industrialized and developing countries, involving market regimes, as well as ownership structure. These processes have called for new and innovative concepts, affecting both the operation of existing hydropower plants and transmission facilities, as well as the development and implementation of new projects. At the same time a sharper focus is being placed on environmental considerations. In this context it is important to emphasize the obvious benefits of hydropower as a clean, renewable and sustainable energy source. It is however also relevant to focus on the impact on the local environment during the planning and operation of hydropower plants. New knowledge and methods have been developed that make it possible to mitigate the local undesirable effects of such projects. Development and operation of modern power systems require sophisticated technology. Continuous research and development in this field is therefore crucial to maintaining hydropower as a competitive and environmentally well-accepted form of power generation.

Will Catholics Be Left Behind

A Catholic Critique of the Rapture and Today's Prophecy Preachers

Ignatius Press This powerful and timely book, written by a former Fundamentalist, is a thorough critique of the popular Fundamentalist notion of the "Rapture" — the belief that Christians will be removed from earth prior to a time of Tribulation and the Second Coming. It examines the theological, historical, and Biblical basis for "premillennial dispensationalism", the belief system based around the Rapture, and popularized in the best-selling Left Behind books and taught by "Bible prophecy" writers Tim LaHaye, Hal Lindsey, Jack Van Impe, and many others. Written for both the lay person and the serious student, this book combines an engaging, popular approach with detailed footnotes and exhaustive research. Beginning with the big picture, it focuses first on key concepts such as eschatology, the Parousia, and the relationship between the Kingdom and the Church. It then examines the Book of Revelation, providing insights into the nature and purpose of that difficult, final book of the Bible. Another chapter looks at the concept of the "millennium" and how it has been understood by various Christians over the centuries. Olson then shows how Left Behind creator LaHaye's many works on "Bible prophecy" are filled with attacks on Catholicism, and often rely on sensationalism, shaky scholarship, and subjective interpretations of Scripture. Olson, a former dispensationalist who now edits Envoy magazine, also presents a history of apocalyptic belief and theology, beginning with the Early Church Fathers and including the Montanists, St. Augustine, Joachim of Fiore, the Protestant Reformers, and the American Puritans. He shows how John Nelson Darby, an ex-Anglican priest, developed the premillennial dispensationalist system, which hinges on the Rapture, in the 1830s and how Darby relied upon faulty assumptions about Jesus Christ, the Church, and the Bible. The second part of the book, "A Catholic Critique of Dispensationalism," focuses on three important topics: the relationship between Israel, the Church, and the Kingdom; the interpretation of Scripture; and the nature of the Rapture event. Filled with a wealth of information drawn from both Protestant and Catholic sources, this section provides a complete rebuttal to the premillennial dispensationalist system and the "left behind" theology. The book concludes with a reflection on the Catholic understanding of the end times, salvation history, and the final judgement. Glossaries of key persons and terms are also included. A strong, but fair, critique of a dangerous and popular belief, Will Catholics Be "Left Behind"? provides Catholics and Protestants, lay people and clergy, and students and scholars with important answers and information about the roots and meaning of the "Rapture".

Assistive Technology on the Threshold of the New Millennium

IOS Press The field of assistive technology is influenced by the ongoing and rapid development of mainstream technologies on the one hand and continuing changes to social systems in relation to societal events - such as the ageing of the population - on the other. The articles in this book provide a broad overview of developments in technical support for people with functional restrictions: key technologies like telecommunications and IT are addressed, while low-tech practical solutions are also considered.

Essential Eschatology

Our Present and Future Hope

InterVarsity Press Study of eschatology often gets bogged down in minutiae that rarely seems to affect daily life. Avoiding this trap, John Phelan gets to the heart of the matter by examining how Christian hope and practice of resurrection impact everything.

Writing the Rapture

Prophecy Fiction in Evangelical America

Oxford University Press For the past twenty years, evangelical prophecy novels have been a powerful presence on American bestseller lists. Emerging from a growing conservative culture industry, the genre dramatizes events that many believers expect to occur at the end of the age - the rapture of the saved, the rise of the Antichrist, and the fearful tribulation faced by those who are "left behind." Seeking the forces that drove the unexpected success of the Left Behind novels, Crawford Gribben traces the gradual development of the prophecy fiction genre from its eclectic roots among early twentieth-century fundamentalists. The first rapture novels came onto the scene at the high water mark of Protestant America. From there, the genre would both witness the defeat of conservative Protestantism and participate in its eventual reconstruction and return, providing for the renaissance of the evangelical imagination that would culminate in the Left Behind novels. Yet, as Gribben shows, the rapture genre, while vividly expressing some prototypically American themes, also serves to greatly complicate the idea of American modernity-assaulting some of its most cherished tenets. Gribben concludes with a look at "post-Left Behind" rapture fiction, noting some works that were written specifically to counter the claims of the best-selling series. Along the way, he gives attention not just to literary fictions, but to rapture films and apocalyptic themes in Christian music. *Writing the Rapture* is an indispensable guide to this flourishing yet little understood body of literature.
