True power must nest in the ownership of the real estate wherever Afrikan people dwell. Economic destiny determines biological destiny. 'Blueprint for Black Power' details a master plan for the power revolution necessary for Black survival in the 21st century. White treatment of Afrikan Americans, despite a myriad of theories explaining White behavior, ultimately rests on the fact that they can. They possess the power to do so. Such a power differential must be neutralized if Blacks are to prosper in the 21st century ... Aptly titled, 'Blueprint for Black Power' stops not at critique but prescribes radical, practical theories, frameworks and approaches for true power. It gives a biting look into Black potentiality. (Back cover). **Narrating Friendship and the British Novel, 1760-1830** Taylor & Francis Friendship has always been a universal category of human relationships and an influential motif in literature, but it is rarely discussed as a theme in its own right. In her study of how friendship gives direction and shape to new ideas and novel strategies of plot, character formation, and style in the British novel from the 1760s to the 1830s, Katrin Berndt argues that friendship functions as a literary expression of philosophical values in a genre that explores the psychology and the interactions of the individual in modern society. In the literary historical period in which the novel became established as a modern genre, friend characters were omnipresent, reflecting enlightenment philosophy's definition of friendship as a bond that civilized public and private interactions and was considered essential for the attainment of happiness. Berndt's analyses of genre-defining novels by Frances Brooke, Mary Shelley, Sarah Scott, Helen Maria Williams, Charlotte Lennox, Walter Scott, Jane Austen, and Maria Edgeworth show that the significance of friendship and the increasing variety of novelistic forms and topics represent an overlooked dynamic in the novel's literary history. Contributing to our understanding of the complex interplay of philosophical, socio-cultural and literary discourses that shaped British fiction in the later Hanoverian decades, Berndt's book demonstrates that novels have conceived the modern individual not in opposition to, but in interaction with society, continuing Enlightenment debates about how to share the lives and the experiences of others. **Russia's Long Twentieth Century Voices, Memories, Contested Perspectives** Routledge Covering the sweep of Russian history from empire to Soviet Union to post-Soviet state, Russia's Long Twentieth Century is a comprehensive yet accessible textbook that situates modern Russia in the context of world history and encourages students to analyse the ways in which citizens learnt to live within its system and create distinctly Soviet identities from its structures and ideologies. Chronologically organised but moving beyond the traditional Cold War framework, this book covers topics such as the accelerating social, economic and political shifts in the Russian empire before the Revolution of 1905, the construction of the socialist order under Bolshevik government, and the development of a new state structure, political ideology and foreign policy in the decades since the collapse of the Soviet Union. The authors highlight the polemics and disagreements that energize the field, discussing interpretations from Russian, émigré, and Western historiographies and showing how scholars diverge sharply in their understanding of key events, historical processes, and personalities. Each chapter contains a selection of primary sources and discussion questions, engaging with the voices and experiences of ordinary Soviet citizens and familiarizing students with the techniques of source criticism. Illustrated with images and maps throughout, this book is an essential introduction to twentieth-century Russian history. **General Defences in Criminal Law Domestic and Comparative Perspectives** Routledge The law relating to general defences is one of the most important areas in the criminal law, yet the current state of the law in the United Kingdom reveals significant problems in the adoption of a consistent approach to their doctrinal and theoretical underpinnings, as exemplified by a number of recent developments in legislation and case law. A coherent and joined-up approach is still missing. This volume provides an analysis of the main contentious areas in British law, and proposes ways forward for reform. The collection includes contributions from leading experts across various jurisdictions. Part I examines the law in the United Kingdom, with specialist contributions on Irish and Scottish law. Part II consists of contributions by authors from a number of foreign jurisdictions, all written to a common research grid for maximum comparability, which provide a wider background of how other legal systems treat problems relating to general defences in the context of the criminal law, and which may serve as points of reference for domestic law reform. **Something to Hide** Random House The bestselling author of *The Best Exotic Marigold Hotel* and *Tulip Fever* is back with a warm, witty and wise novel about the unexpected twists that later life can bring...
