### In the Beginning

Paradigma Ltd This book is a sequel (or better: a prequel) to Immanuel Velikovsky's main work, the best-selling *Worlds in Collision*, in which he gave a detailed reconstruction of two global natural catastrophes based on information handed down by our ancestors. He mentioned there that, as part of his intensive research, he found numerous indications of even more catastrophes that took place earlier in the history of mankind. In the present book, the material collected by Velikovksy about this topic is presented to the public for the first time. His findings show just how turbulent the history of Earth and our planetary system was during the time of mankind and how little we actually know of all that today.

### Nature Spirits and Nature Forces

Lulu Press, Inc This volume contains mystical writings of Max Heindel on the little understood subject of Nature Spirits and Nature Forces. It is a correlation from his many books, lovingly collected in one volume by one of Max Heindel's students. Max Heindel is known as the most advanced of Western Mystics and has in his numerous books given to the world a mine of information about Nature Spirits, the little people with whom he had such interesting experiences. The writer has listened to many stories (which unfortunately have not been put in writing) of his experiences with these Spirits, of how they live and their appearance. He had many times remarked that he would sometime write an entire book on the Nature Spirits, but his very arduous work of pioneering interfered with this much needed work.

systems, he makes the step into crowd psychology and reopens the case of Worlds in Collision from a totally different point of view: as a psychoanalytical case study.

### An Autobiography

Wayne State University Press Samuel Noah Kramer is the leading authority on the interpretation and reading of civilization's oldest literature. His life and life's work are so thoroughly intertwined that his autobiography is also the story of the recovery of the language and literature of the Sumerians. From young Talmudist to the patriarch of Sumerology, Kramer recounts his long and distinguished career. Writing for the non-specialist, he paints a panoramic view of Sumerian literature and provides thumbnail sketches of the individuals with whom he collaborated.

### The Magus. Book II

IN our following Treatise of Magnetism we have collected and arranged in order some valuable and secret things out of the writings of that most learned chemist and philosopher Paracelsus, who was the ornament of Germany and the age he lived in. Likewise we have extracted the very marrow of the science of Magnetism out of the copious and elaborate works of that most celebrated philosopher (by fire) Van Helmont, who, together with Paracelsus, industriously promulgated all kinds of magnetic and sympathetic cures, which, through the drowsiness, ignorance, unbelief, and obstinacy of the present age, have been so much and so totally neglected and condemned; yet, however impudent in their assertions, and bigotted to their own false opinions, some of our modern philosophers may be, yet we have seen two or three individuals, who, by dint of perseverance, have proved the truth and possibility of Magnetism, by repeated and public experiments. Indeed the ingenious invention of the Magnetic Tractors prove at once that science should never be impeded by public slander or misrepresentation of facts that have proved to be of general utility. And we do not doubt but that we shall be able to shew, by the theory and practice delivered in the sequel, that many excellent cures may be performed by a due consideration and attentive observance of the principles upon which sympathy, antipathy, magnetic attraction, &c. are founded; and which will be fully illustrated in the following compendium: We shall hasten to explain the first principles of Magnetism, by examining the magnetic or attractive power.

Weiser Books First published in 1896, King presents the cuneiform text of a group of 60 clay tablets inscribed with prayers and religious compositions of a devotional and magical character. King's illustrations feature a transliteration of each tablet with an English translation of well-preserved passages. ## The Book of Enoch

**FilRougeViceversa** As the Book of Enoch is, in some respects, the most notable extant apocalyptic work outside the canonical Scriptures, it will not be inappropriate to offer a few remarks here on the Apocalyptic Literature generally. In writing about the books which belong to this literature, Prof. Burkitt says very pointedly that "they are the most characteristic survival of what I will venture to call, with all its narrowness and its incoherence, the heroic age of Jewish history, the age when the nation attempted to realize in action the part of the peculiar people of God. It ended in catastrophe, but the nation left two successors, the Christian Church and the Rabbinical Schools, each of which carried on some of the old national aims. And of the two it was the Christian Church that was most faithful to the ideas enshrined in the Apocalypses, and it did consider itself, not without some reason, the fulfilment of those ideas. What is wanted, therefore, in studying the Apocalypses is, above all, sympathy with the ideas that underlie them, and especially with the belief in the New Age. And those who believe that in Christianity a new Era really did dawn for us ought, I think, to have that sympathy. . . . We study the Apocalypses to learn how our spiritual ancestors hoped again that God would make all right in the end; and that we, their children, are here today studying them is an indication that their hope was not wholly unfounded."

## The Ash Wednesday Supper

**Mouton De Gruyter** Giordano Bruno was an itinerant Italian friar who was burned at the stake in 1600 for heresies, which included his rejection of the Ptolemaic cosmology. Of his important writings, 'La Cena de le ceneri' was one of the first works in which Copernican theory had impact outside the sphere of the natural sciences. Arguing for the physical reality of the infinite universe with no centre, Bruno sought to prove that each man is every man, that conflict would be resolved if all men accepted the unifying potential of his hermetic religion. Using this radical cosmology, Bruno sought to heal the secular and religious wounds of sixteenth-century Europe.
