Hydrogen Technology

Mobile and Portable Applications

Springer Science & Business Media [Aline Leon´ In the last years, public attention was increasingly shifted by the media and world governments to the concepts of saving energy, reducing pollution, protecting the environment, and developing long-term energy supply solutions. In parallel, research funding relating to alternative fuels and energy carriers is increasing on both national and international levels. Why has future energy supply become such a matter of concern? The reasons are the problems created by the world's current energy supply system which is mainly based on fossil fuels. In fact, the energy stored in hydrocarbon-based solid, liquid, and gaseous fuels was, is, and will be widely consumed for internal combustion engine-based transportation, for electricity and heat generation in residential and industrial sectors, and for the production of fertilizers in agriculture, as it is convenient, abundant, and cheap. However, such a widespread use of fossil fuels by a constantly growing world population \(from 2.3 billion in 1939 to 6.5 billion in 2006\) gives rise to the two problems of oil supply and environmental degradation. The problem related to oil supply is caused by the fact that fossil fuels are not renewable primary energy sources: This means that since the first barrel of petroleum has been pumped out from the ground, we have been exhausting a heritage given by nature.](#)

How to Live a Low-Carbon Life

The Individual's Guide to Stopping Climate Change

Routledge Climate change is the greatest challenge facing humanity: drastic reduction of carbon emissions is vital if we are to avoid a catastrophe that devastates large parts of the world. Governments and businesses have been slow to act and individuals now need to take the lead. The Earth can absorb no more than 3 tonnes of carbon dioxide emissions each year for every person on the planet if we are to keep temperature and rainfall change within tolerable limits. Yet from cars and holiday flights to household appliances and the food on our plates, Western consumer lifestyles leave each of us responsible for over 12 tonnes of carbon dioxide a year - four times what the Earth can handle. Individual action is essential if we want to avoid climate chaos. How to Live a Low-Carbon Life shows how easy it is to take responsibility, providing the first comprehensive, one-stop reference guide to calculating your CO2 emissions and reducing them to a sustainable 3 tonnes a year.

William Shakespeare's Long Lost First Play (Abridged)

Broadway Play Publishing Discovered in a treasure-filled parking lot in Leicester, England (next to a pile of bones that didn't look that important), an ancient manuscript proves to be the long-lost first play written by none other than seventeen-year-old William Shakespeare from Stratford. We are totally not completely making this up. WILLIAM SHAKESPEARE'S LONG LOST FIRST PLAY (abridged) is the literary holy grail: an actual manuscript in Shakespeare's own hand showing all his most famous characters and familiar speeches in a brand-new story. But because it's one hundred hours long and contains multiple unwieldy storylines, it was decided, as a public service, to abridge it down to a brief and palatable ninety-minute performance for this lost masterpiece. "Something wickedly funny this way comes!" The New York Times "A breathlessly irreverent, pun-filled romp!" The Washington Post "A top-notch comic deconstruction of Shakespeare!" The Stage--U K

From Docks and Sand

Southport and Bootle's Battalion, the 7th King's Liverpool Regiment, in the First World War

Wolverhampton Military Studies This book is a study of the importance and significance of community identity to a fighting unit in the First World War. In this case the unit in question is primarily 7th King's Regiment and more widely the 55th West Lancashire Division, 1914-18. The book is based upon the author's own PhD thesis "The 1/7th Battalion King's Liverpool Regiment and the Great War - the experience of a Territorial battalion and its Home Towns". It is an analysis of the relevance of the local communities to the battalion and its division and its combat effectiveness; the role played by the army in the local communities' involvement in the War; and the post-War ramifications of this relationship. In focusing on 1/7th Battalion Kings Liverpool Regiment, a Territorial battalion based in Bootle, Southport and the surrounding area of south west Lancashire, the thesis follows a typical Territorial unit and its home towns from recruitment and establishment to demobilisation and beyond. A wide range of primary sources have been examined

including local newspapers, local Council records, official War Diaries of the various units, battle reports and private papers of several of the combatants in an extensive compilation of research. New perspectives are presented on several aspects of the First World War including the Lusitania riots; the battles of Festubert, 1915, and Givenchy, 1918; and the role of charities in post-War reconstruction work. It also raises general issues about the role of the Territorial Force and draws attention to several gaps in the social and military historiography of the War. The conclusion of the book is that local and community identity contributed significantly towards the 1/7th Kings' morale, organisation and hence battle effectiveness. This contribution initially stemmed from the local recruits themselves but was actively nurtured and encouraged by commanders at Battalion, Brigade and Divisional level throughout the War. It also establishes that by putting the local Battalion at the centre of its concerns, the rather disparate communities were able to organise, coalesce and maximise their War effort and support. Finally, it demonstrates in the post-War years, that, despite the fluctuations in this mutually important relationship, the local identification with the Battalion was maintained in memorialisation, remembrance and reconstruction.
