HOW TO BUILD MAX-PERFORMANCE MITSUBISHI 4G63T ENGINES

Cartech *The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.*

ENVIRONMENTAL HEAVY METAL POLLUTION AND EFFECTS ON CHILD MENTAL DEVELOPMENT

RISK ASSESSMENT AND PREVENTION STRATEGIES

Springer Science & Business Media Heavy metals can be emitted into environment by both natural and anthropogenic sources, mainly mining and industrial activity. Human exposure occurs through all environmental media. Infants are more susceptible to the adverse effects of exposure. Increasing attention is now being paid to the mental development of children exposed to heavy metals. The purpose of this book is to evaluate the existing knowledge on intellectual impairment in children exposed to heavy metals in their living environment and to identify the research needs in order to obtain a clearer picture of the situation in countries and regions at risk, in which the economy is closely related to metallurgy and heavy metals emission, and to recommend a strategy for human protection. In greater detail the main objectives could be formulated as follows: to review the principal sources of single, and complex mixtures of, heavy metal pollutants in the environment; to identify suitable methodology for chemical analyses in the environment and in humans; to evaluate the existing methods for measuring mental impairment, including their reliability and validity; to recommend a standard testing protocol to be used in future research; to assess the future role of environmental heavy metal pollution in countries and regions at risk and its effects on children's neurological development; to recommend a prevention strategy for protecting children's health and development.

MUNCIE 4-SPEED TRANSMISSIONS

HOW TO REBUILD & MODIFY

CarTech Inc The Muncie 4-speeds, M20, M21, and M22 are some of the most popular manual transmissions ever made and continue to be incredibly popular. The Muncie was the top high-performance manual transmission GM offered in its muscle cars of the 60s and early 70s. It was installed in the Camaro, Chevelle, Buick GS, Pontiac GTO, Olds Cutlass, and many other classic cars. Many owners want to retain the original transmission in their classic cars to maintain its value. Transmission expert and veteran author Paul Cangialosi has created an indispensable reference to Muncie 4-speeds that guides you through each crucial stage of the rebuild process. Comprehensive ID information is provided, so you can positively identify the cases, shafts, and related parts. It discusses available models, parts options, and gearbox cases. Most important, it shows how to completely disassemble the gearbox, identify wear and damage, select the best parts, and complete the rebuild. It also explains how to choose the ideal gear ratio for a particular application. Various high-performance and racing setups are also shown, including essential modifications, gun drilling the shafts, cutting down the gears to remove weight, and achieving race-specific clearances. Muncie 4-speeds need rebuilding after many miles of service and extreme use. In addition, when a muscle car owner builds a high-performance engine that far exceeds stock horsepower, a stronger high-performance transmission must be built to accommodate this torque and horsepower increase. No other book goes into this much detail on the identification of the Muncie 4-speed, available parts, selection of gear ratios, and the rebuild process.

THE INDONESIA READER

HISTORY, CULTURE, POLITICS

Duke University Press *Indonesia is the world's largest archipelago, encompassing nearly eighteen thousand islands. The fourth-most populous nation in the world, it has a larger Muslim population than any other. The Indonesia Reader is a unique introduction to this extraordinary country. Assembled for the traveler, student, and expert alike, the Reader includes more than 150 selections: journalists' articles, explorers' chronicles, photographs, poetry, stories, cartoons, drawings, letters, speeches, and more. Many pieces are by Indonesians; some are translated into English for the first time. All have introductions by the volume's editors. Well-known figures such as Indonesia's acclaimed novelist Pramoedya Ananta Toer and the American anthropologist Clifford Geertz are featured alongside other artists and scholars, as well as politicians, revolutionaries, colonists, scientists, and activists. Organized chronologically, the volume addresses early Indonesian civilizations; contact with traders from India, China, and the Arab Middle East; and the European colonization of Indonesia, which culminated in centuries of Dutch rule. Selections offer insight into Japan's occupation (1942-45), the establishment of an independent Indonesia, and the post-independence era, from Sukarno's presidency (1945-67), through Suharto's dictatorial regime (1967-98), to the present Reformasi period. Themes of resistance and activism recur: in a book excerpt decrying the exploitation of Java's natural wealth by the Dutch; in the writing of Raden Ajeng Kartini (1879-1904), a Javanese princess considered the icon of Indonesian feminism; in a 1978 statement from East Timor objecting to annexation by Indonesia; and in an essay by the founder of Indonesia's first gay activist group. From fifth-century Sanskrit inscriptions in stone to selections related to the 2002 Bali bombings and the 2004 tsunami, The Indonesia Reader conveys the long history and the cultural, ethnic, and ecological diversity of this far-flung archipelago nation.*

SYSTEMS DEVELOPMENT METHODS FOR THE NEXT CENTURY

Springer Science & Business Media This book is a result of the ISD'97, Sixth International Conference on Information Systems Development-Methods and Tools, Theory and Practice held August 11-14, 1997 in Boise, Idaho, USA. The purpose of this Conference was to address the issues facing academia and industry when specifying, developing, managing and improving software systems. The selection of papers was carried out by the International Program Committee. All papers were reviewed in advance by at least three people. Papers were judged according to their originality, relevance and presentation quality. All papers were judged purely on their own merits, independently of other submissions. This year's Information Systems Development Conference-ISD'97 is the first ISD conference being held in the US. ISD was brought into existence almost ten years ago. It continues the fine tradition of the first Polish-Scandinavian Seminar on Current Trends in Information Systems Development Methodologies, held in Gdansk-Poland in 1988. ISD'98 will be held in Bled, Slovenia. ISD'97 consists not only of the technical program represented in these proceedings, but also tutorials on improved software testing and end-user information systems and workshop on sharing knowledge within international high technology industries that are intended for both, the research and business communities. We would like to thank the authors of papers accepted for ISD'97 who all made gal lant efforts to provide me with electronic copies of their manuscripts conforming to com mon guidelines. We thank them for thoughtfully responding to reviewers comments and carefully preparing their final contributions.
